Winter Boat Shows

Providence Boat Show

January 23rd - 25th

RI Convention Center

New England Boat Show

February 14th - 22nd

BCEC

Worcester RV/Boat Show

March 15th-17th

DCU Center

WELCOMING CHAPARRAL

We feel like children when the calendar turns to December as we wait our first loads of boats from Chaparral. Our new product will be arriving just before the Providence boat show in January. We can't wait for you to get your first look at this incredible line up! We are going to have a great variety of colors, gel schemes, and options on these boats.

The first load of H2O boats will feature an 18 Sport, 19 Sport, 19 Ski & Fish, and a 21 Sport with a folding tower.

The other truck load coming our way will have a 224 Sunesta deck boat with a black Vapor gel scheme. This boat will be an eye catcher for sure! Some key features are the convertible aft seating, head compartment, multiple

cockpit table mounts, and dual fuel fills (yes you read that right. Fuel fills on both sides eliminating the pain of trying to select the right pump).

The 246 SSi bow rider will be in black as well but with a

wideband gel coat scheme, sport graphics and a black folding tower. The 246 has an aft sun pad, head compartment, dual fuel fills, and a swimplatform mat.

We are excited to receive the all new 250 Suncoast. This

outboard powered bow rider will have a 300HP Yamaha Four Stroke on its stern. The SeaDek Teak swim platform mats add a classy look. The head compartment will feature a sink and electric toilet. In the bow, added cushions fill it in to make the perfect sun lounging spot.

These boats will be just a highlight of what Chaparral has to offer! Don't miss your chance to see these boats and more during the winter boat shows and right here in our heated showroom!!

For more information on these and all the other great models Chaparral has to offer check out their website!

2015 BOAT SHOW CIRCUIT

This will be our big debut of the Chaparral Boats!! Yamaha's re-designed 24 models will be on display as well. We will also be featuring our Berkshire Pontoons. This is a great chance to get out of the house and see some great new products!!

The marathon of boat shows begins Feb. 14th and concludes nine days later on the 22nd. We will be in the Yamaha booth as well as the Chaparral Booth for this show. Come on up and visit us at the BCEC!

The DCU Center is the place to be in March! We wrap up the show circuit March 13th-15th with a great display of Yamaha, Chaparral, and Berkshire Pontoons. Spring is just around the corner when this show ends!!!

Twin Engine Kits will fit the new 2015 24' models with the articulating keel as well!! (Special fin is included in the kit)

Steering got you bummed?

For those of you who know all about the advantages of our Yamaha Jet Boats you also know about the learning curve associated with the low speed steering. As the captain you have mastered the technique but that might not be true for the rest of your crew. The answer to your dilemma is simple.. It's time for "fins".

We have hooked up with a great company that makes aftermarket parts for Yamaha Boats. The most popular being Thrust Vectors. The fins are designed to be deployed down at slow speed giving you smaller rudders in the water to help steer. As you accelerate they flip up out of the way and your boat will perform exactly as if nothing has changed.

There are kits available for single engine boats (190/192) and for the twin engine boats (21 and 24). The kits are designed to fit all Yamaha Jet Boats from 1996 to present model year. There a few color options available from the standard all black to combinations like blue over white or white over red.

Single kits start around \$190 for all black and \$210 for colors. The twin engine kits start at \$380 for all black and \$400 for colors.

Light up the water

Boating during the day is a blast. Boating at night can be taken to a whole new level. We can raise your cool factor by a few points with the installation of underwater lighting. There are lot of companies out there that produce underwater lights but there are only a few that make the grade here at Twin City Marine.

In both freshwater and saltwater market Lumitec and OceanLED Amphibian have what we consider the best quality light for the right price. Both companies use a flush mounted light with all the circuitry

built in. A small hole is need to pass the wires into the boat and then connected to the dash. Different color options are available including color changing lights.

Guidance for you Trailer

When approaching your trailer has the thought ever crossed your mind "Man where is my trailer"? We all know with no wind and flat water this task is quite simple and stress-free. Unfortunately mother nature likes to stir things up a bit during these crucial times.

A simple solution is to install guide bars to the trailer to aid you during loading. Not all guide bars are not made the same and we have found a company that takes great pride in giving you a great product while not exploding your wallet.

Some key features of these particular guide bars are the added gusset at the radius to provide unmatched strength should you "bump" one of the bars while loading. The metal upright portion extends 6 inches from the top of the PVC tube. Also there is a round tube holder welding just about the radius to allow the tube to rotate as the boat passes by.

The guide bars come in 47 inch and 60 inch lengths as well as in two different materials, Gold Zinc Plated and Galvanized.

If the white PVC look isn't sitting well with you we have an answer for that as well. Guide Bars Pads that start from 28" and go to 60" with 2" increments. Your choice

of 10 different colors as well!!

Bow Comfort

Keeping with the trailer theme of this page let's talk about your bow roller. Have you looked at your roller lately? Is it all cracked and weathered, or worse is it leaving marks or scratches on your boat? If you are looking to replace it with one that will last for years to come and leave your bow mark/scratch free there is only one choice; the Ultimate Bow roller from Stoltz Industries.

The roller comes in 3" and 4" version (both stocked here at TCMI) and is made of polyurethane rather than rubber or PVC. A new U.V. stabilized formula will maintain its color much longer and lab test have proven the polyurethane has a much better cut

and abrasion resistance than PVC. The Stoltz roller will not mark up your boat or flat spot when pressed against the hull. Best of all it's made in the USA!!!

The Stoltz Bow Roller is the standard roller on the Chaparral H2O trailer. Don't torture your boat any longer.. Upgrade today!!

The Fusion Bluetooth adapter will give any source unit with RCA inputs wireless streaming capabilities

A musical upgrade

One thing that every boat has in common is the need for music. Most OEMs aren't looking for the ultimate stereo package when they are building a boat, but that doesn't mean the customer wants to settle for OK sound. It is tough to find a company who can excel in making a great product that can also withstand the harsh marine environment. That is until you see what Fusion Electronics has to offer.

Fusion has developed what they call True-Marine™ products. All of their products are designed, engineered, and test for the marine environment.

Fusion offers a few different source units but their most popular are the 700 series and the 205 model.

The MS-IP700i source unit features a sealed internal iPhone/iPod dock for complete integration and control. Multi-zone control allows you to adjust the speaker volume in up to 4 different areas of your boat. The built in Class D amplifier boost the radio output to 70 Watts per channel compared to the average 45 Watts of most source units.

The Fusion 205 source unit is the ultimate in compact stereo equipment. The base unit has an AM/FM tuner putting out 50 Watts per channel and the USB and Aux inputs on the rear allow for plenty of add-ons.

Installing Fusion's Bluetooth adapter allows you to stream music right from your device using your favorite music streaming apps.

The revolutionary UNI-Dock™ supports the widest array of smart phones, media players and USB devices on the market. Compatible with FUSION's innovative MS-AV7000, MS-AV700i, MS-IP700i and MS-RA205, the new UNI-Dock™ allows users to enjoy on-the-water entertainment from an extensive range of Apple and supported MTP (Media Transfer Protocol) enabled Android and Windows smartphones. Three adaptor cables are included with the UNI-Dock™ (1xUSB - Apple 30Pin, 1xUSB - Apple Lightning, 1xUSB - MicroUSB) for convenient connection to the widest range of supported devices.

Fusion doesn't stop at just source unit. Their speakers come in 4,6, and 7 inch as well as boxed speakers for your cabin. Their full range marine speakers incorporate CURV cone technology and titanium tweeters produce powerful and clear sound. Speakers come standard with white or black grills. The optional Sport grills add the extra bling that you might be looking for!

Come see these products on display in our store!

WetSounds is coming...

Another recent addition to the showroom here at Twin City is the Wet Sounds brand of tower and boat speakers. All of Wet Sounds products are designed for high performance in the harsh marine world.

The Icon8 tower series is a performance designed speaker for a full mid bass sound with clean details in the high ranges. The Icon series is a great addition to any tower to give full sound in and around the boat.

The Revolution series speakers provide remarkable volume and full range sounds at distances of 80 feet and more. With it's patented Rev-Tec technology the rider will have clear sound outside of the wake to almost parallel to the boat.

Available in Black, White, or the Special Edition Pink

What would speakers be without LED lights?? Wet Sounds offers light rings for all the tower, in boat, and subwoofers. A great add on to make your boat stick out at night!

Water Sport Fun!

Check out some of the new Tow-ables coming to our store that will compliment our full range of Yamaha branded tubes!

Every Pontoon Needs a Slide!!

Twin City on Facebook

Everyone likes to show off their pride and joys. This season we would like to see you, your family, and your boats in action!!

[** JUST CLICK HERE **](#)

We are looking forward to seeing all of your photos!!

Our Facebook page loves new post especially pictures so post away! Try to be creative and get our logo involved and who knows you might just win a prize!!!

If you don't already "like us" on Facebook then what are you waiting for?!?!?

From the Helm Seat

The holiday season is loved by some and dreaded by others. I have always loved this quote from the movie Scrooged "It's Christmas Eve! It's the one night of the year when we act a little nicer, we smile a little easier, we cheer a little more. For a couple of hours out of the whole year, we are the people that we always hoped we would be!" Today "Life" seems to always get in the way of taking the extra time to smile at someone, help out a friend in need, or even just calling our family. The holiday season seems to bring us all back together. Enjoy your time with family, whether it's a baby's first Christmas or Grandma's 80th. As the Mutter family gathers on Christmas night for our ritual espresso martini-poolooza, we will be toasting to all of you. Thank you for being a part of our family. We wish all of you a great holiday season and a Happy New Year!!

Best Wishes,
The Mutters

Meet the Family

A quick introduction...

Keith Mutter - service@twincitymarine.com

- President, Service Manager, Wood Craftsman and Corvette enthusiast

Rudy Mutter III - rudy@twincitymarine.com

- Vice President, Sales , and connoisseur of Espresso Martinis and 80's music

Kay Mutter - parts@twincitymarine.com

- Parts Specialist, Customer Service, the Nicest person at Twin City and Keith's better half

Bryan Mutter - bryan@twincitymarine.com

- Sales, Parts, Service, Men's League Hockey Legend and can be found wrapped around his daughter Diem's finger

Ron Laplante

- Service Technician, Resident Comedian and Singer, Model car, train, plane extraordinaire

Mark Benway

- Service Technician, Able to fit in tight spaces, Rec League Basketball All-star
