THE FOLLOWING SERVICE & MATERIALS ARE INCLUDED

ENGINE SERVICE:

Add fuel conditioner, change engine oil & filter, change fuel/water separator, drain water from engine block & manifolds, fill engine block & manifolds with non-toxic antifreeze, fog engine if required, spray engine with corrosion inhibitor, overall inspection.

OUTDRIVE SERVICE:

Change gear oil in outdrive, lube where necessary without removing outdrive, overall inspection.

INBOARD TRANSMISSION SERVICE:

Change transmission fluid, check seals for leaks, overall inspection.

NOTE:

- * Please leave fuel tank ½ to ¾ full to prevent condensation.
- * Outdrives will be removed during winterization when deemed necessary for repair.
- * Boats kept in salt water and stored at CE are required to have outdrive removed and serviced.
- * Boats kept in salt water and not stored at CE are recommended to have outdrive removed and serviced. All others check with service department on recommended removal and service.
- * Winterization does not include running or checking an engine in the spring.

FOR COMPARISON

When having your boat winterized remember, Candlewood East provides a complete winterizing process that guarantees your boat will be serviced and stored properly. We believe that your boat is a valuable investment and should be cared for by winterizing the best way possible! Thanks for your business and trust.
